

DAILY REFERENCE · SENSITIVE COMBINATION SKIN

Skincare routine

Built gentle and barrier-first. The order of steps matters; the weekly rhythm below keeps the actives from overlapping and irritating.

MORNING

every day

- ① **Cleanse**
The Ordinary Glucoside Foaming Cleanser
- ② **Serum**
Beauty of Joseon Glow Serum · propolis + niacinamide
- ③ **SPF**
Beauty of Joseon Relief Sun · rice + probiotics
- + **Light gel moisturiser**
only if skin feels tight – serum + SPF is usually enough

EVENING

every day

- ① **First cleanse**
Clinique Take The Day Off Balm · on dry skin, massage, rinse – lifts SPF
- ② **Second cleanse**
The Ordinary Glucoside Foaming Cleanser
- ③ **Treatment**
varies by night – see weekly rhythm
- ④ **Moisturise**
Round Lab Birch Juice Cream · keep clear of the under-eye area

WEEKLY RHYTHM

Exfoliating toner on 3 set nights. Benzoyl peroxide slots into other nights only when you need it for spots. Weekends are barrier-recovery nights – just cleanse and moisturise.

MON	TUE	WED	THU	FRI	SAT	SUN
Toner	BP if needed	Toner	BP if needed	Toner	Barrier	Barrier

■ Green Plum AHA+BHA toner ■ Acnecide BP 5% ■ Cleanse + moisturise only

Never the toner and benzoyl peroxide on the same night or the same patch of skin – that combination is what tips reactive skin into irritation.

SPOT CARE

- **Glow Hub Zit Zap wand** – daytime touch-ups on individual spots
- **Acnecide BP 5%** – overnight on spots, on a BP night
- One treatment per spot, not both stacked – and not over freshly toned skin

MILIA (UNDER EYES)

- None of these products will clear existing milia – professional extraction is the reliable route
- Keep balm and cream off the immediate under-eye area so you're not feeding new ones

IF YOU ADD AZELAIC ACID

- **The Ordinary Azelaic Acid Suspension 10%** – evening treatment step
- Run it alone for 1-2 weeks before layering with anything else
- Can take over some of the chin/jaw work so you lean less on BP

GROUND RULES

- One new product at a time, patch test first
- Stinging or redness means scale back the frequency – don't push through
- SPF every morning, no exceptions, while using acids or BP

Sensitive skin · introduce slowly · review what's working every few weeks
